

Add-On Installation Process

Ken Ficara, 27 December 2016

Before you start, make sure you know what version you're working with. The Chrome web store displays an incorrect version number in some places. The correct version number is indicated below with green arrows; the incorrect one with red:

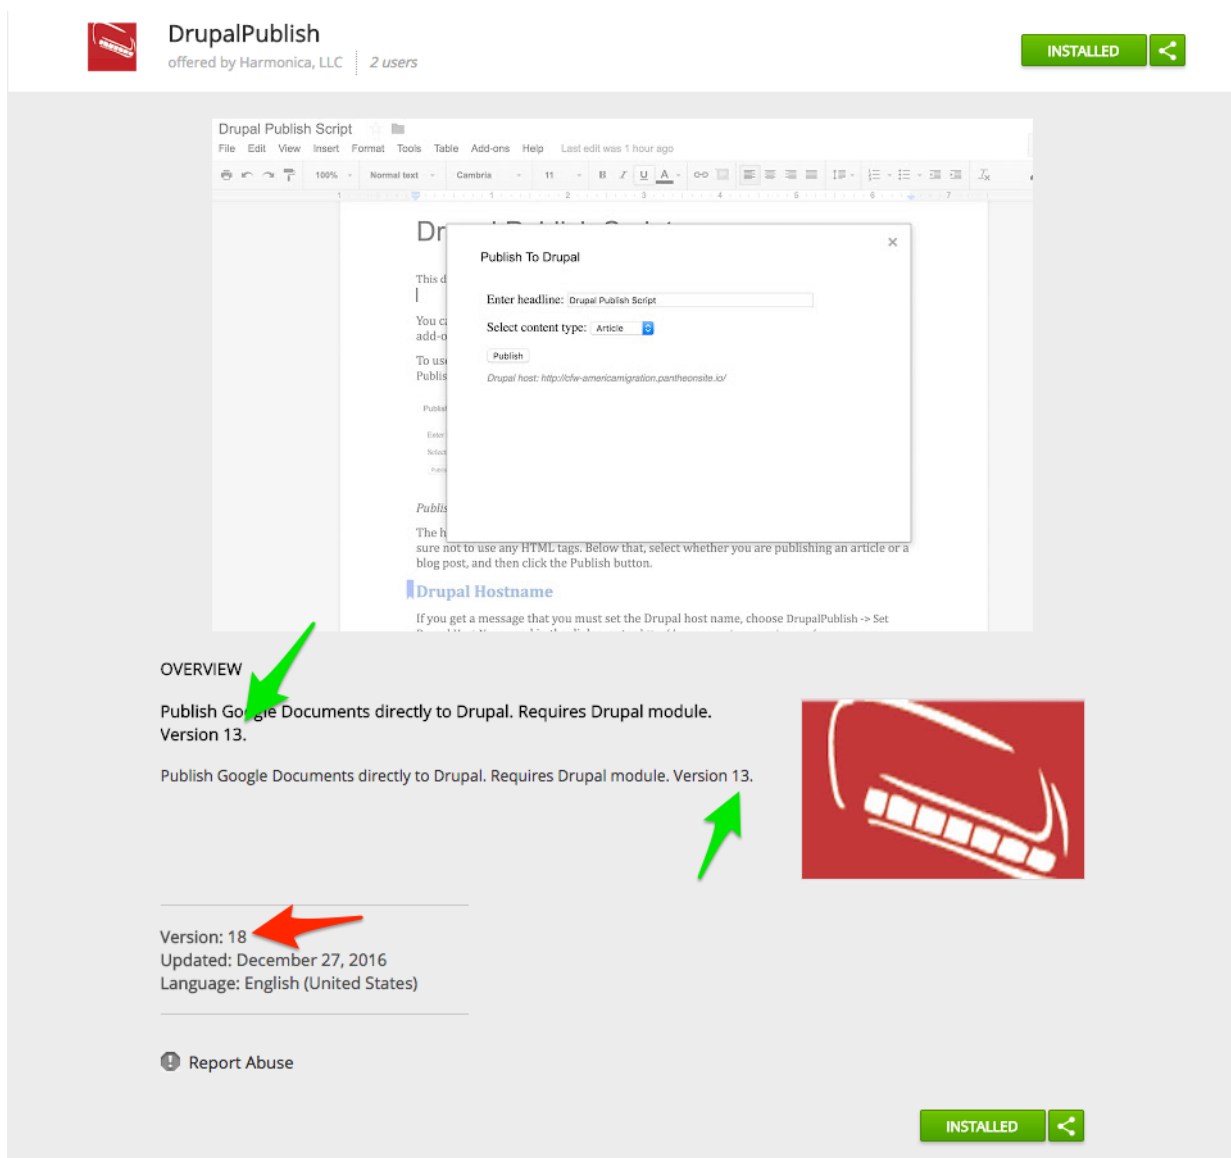

Figure 1: Correct and incorrect versions as shown in Chrome web store.

Version in Script Editor

The correct version number will match the version shown under **File -> Manage Versions** in the script editor:

✕

Manage Versions

A version is a snapshot of your project that can be used as a library in other projects.

Save New Version

Version	Description	Saved By	Date	
13	Improve checking of Drupal host name	ken@americamedia.org	2016-12-27 16:16	✕
12	Fixes onOpen problem (AM-1563)	ken@americamedia.org	2016-12-27 15:36	✕
11	Remove globals, remove all UI calls	ken@americamedia.org	2016-12-27 14:54	✕
10	Add diagnostics	ken@americamedia.org	2016-12-27 14:02	✕
9	Remove properties call from OnOpen	ken@americamedia.org	2016-12-27 13:56	✕
8	Add warnings for unsupported elements, don't insert newlines around inline tags, handle self-closing tags	ken@americamedia.org	2016-12-21 13:52	✕
7	Fix list processing routine to use new text processing routine (oops)	ken@americamedia.org	2016-12-20 16:56	✕
6	Replace original text processing routine	ken@americamedia.org	2016-12-20 16:47	✕

OK

Figure 2: Correct version as shown in script editor.

Version in Code

The same version should also be reflected in the code itself:

```
/**
 * @file DrupalPublish.gs
 * @version 13
 *
 * Compile date: Tue Dec 27 2016
 *
 * Debug logging: OFF
 *
```

Figure 3: Correct version as shown in code.

(If it is incorrect, open an issue. Do not change the code in the script editor.)

Remove any old versions

If the add-on is already installed, remove it by going to **Add-ons** -> **Manage Add-ons** and clicking the green **Manage** button, then choosing **Remove**.

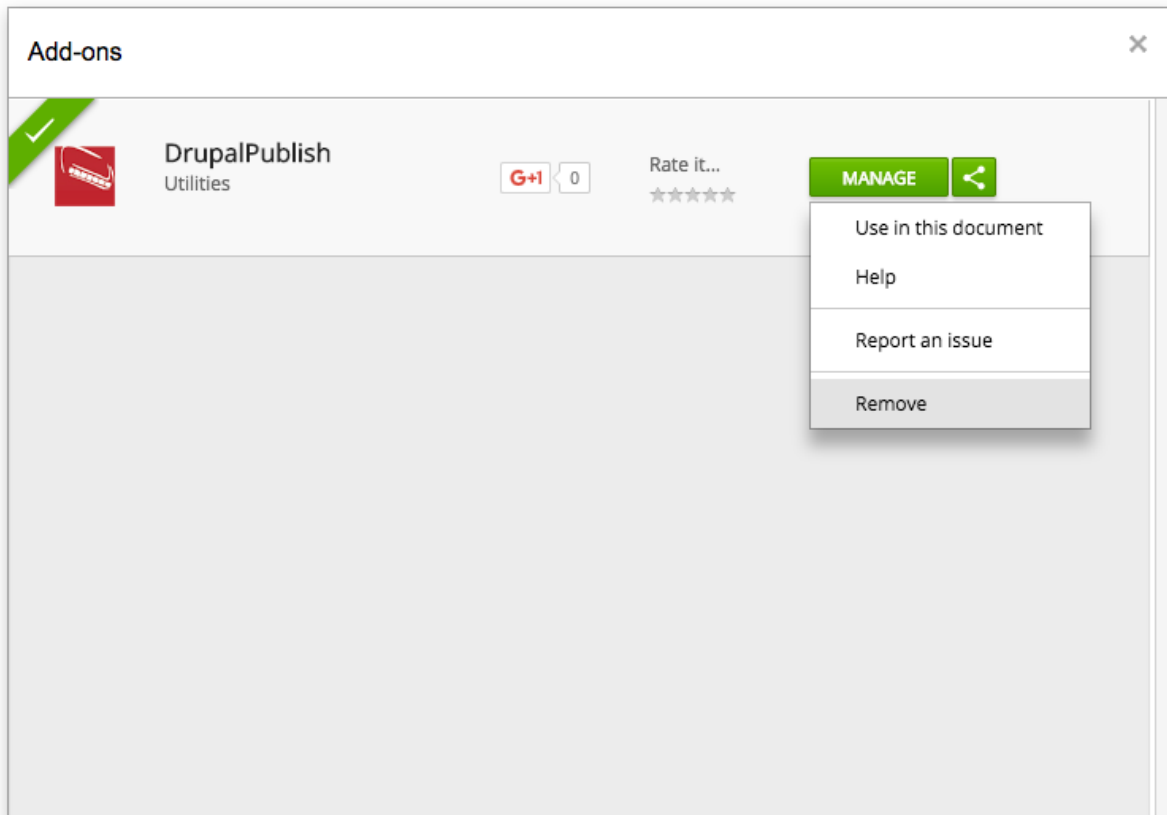

Figure 4: Removing an existing older version.

Ensure old versions are removed

Check under add-ons to make sure it's removed.

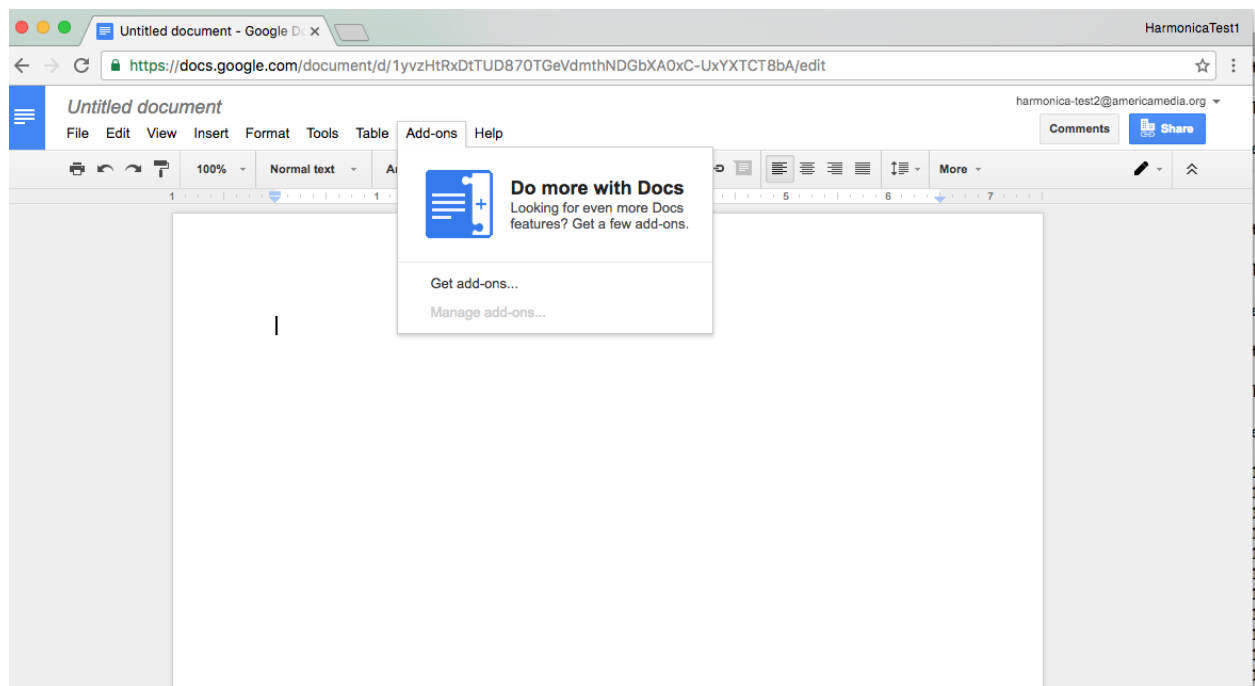

Figure 5: Add-ons, empty.

Find the add-on

Choose **Get Add-ons** and then **For americamedia.org** from top-left dropdown:

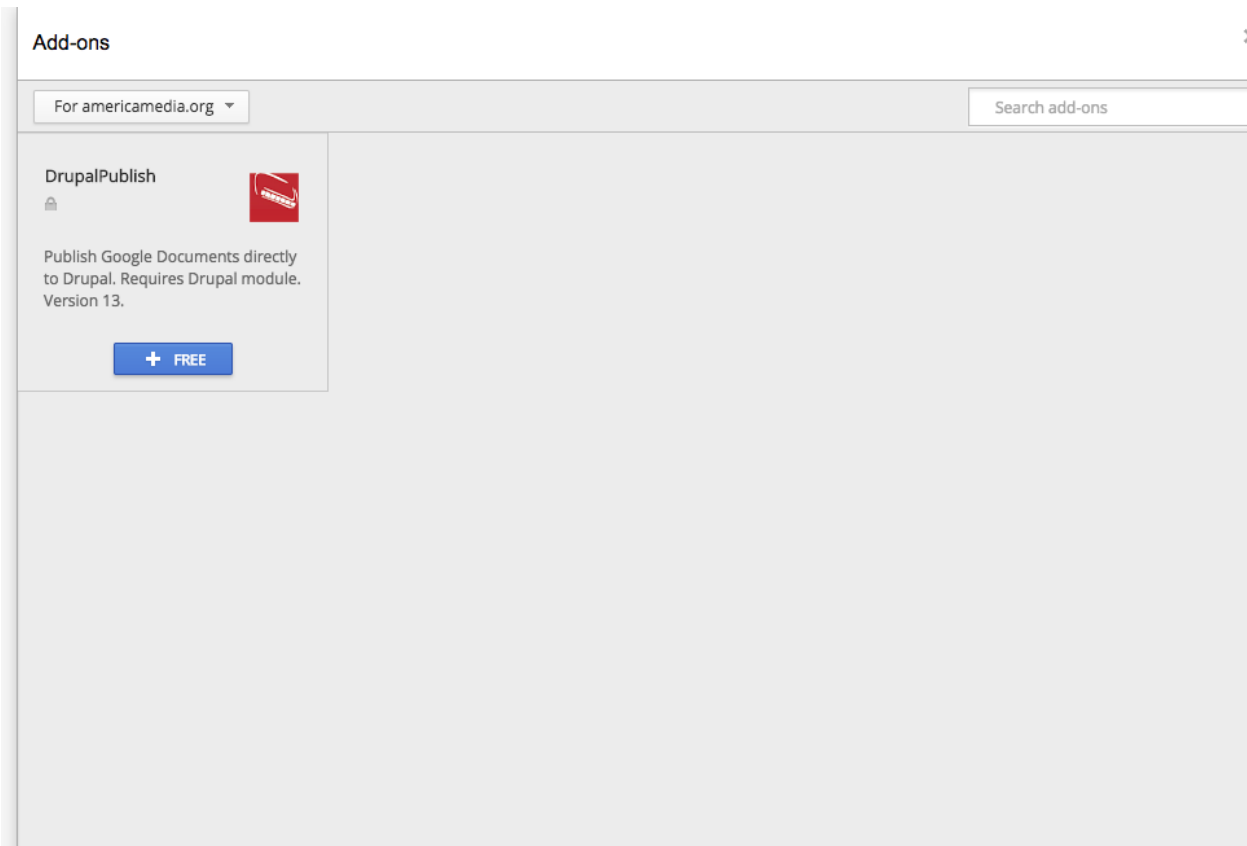

Figure 6: Get add on.

Install the add-on and grant permissions

If the add-on shows version 13, install it and grant it permissions:

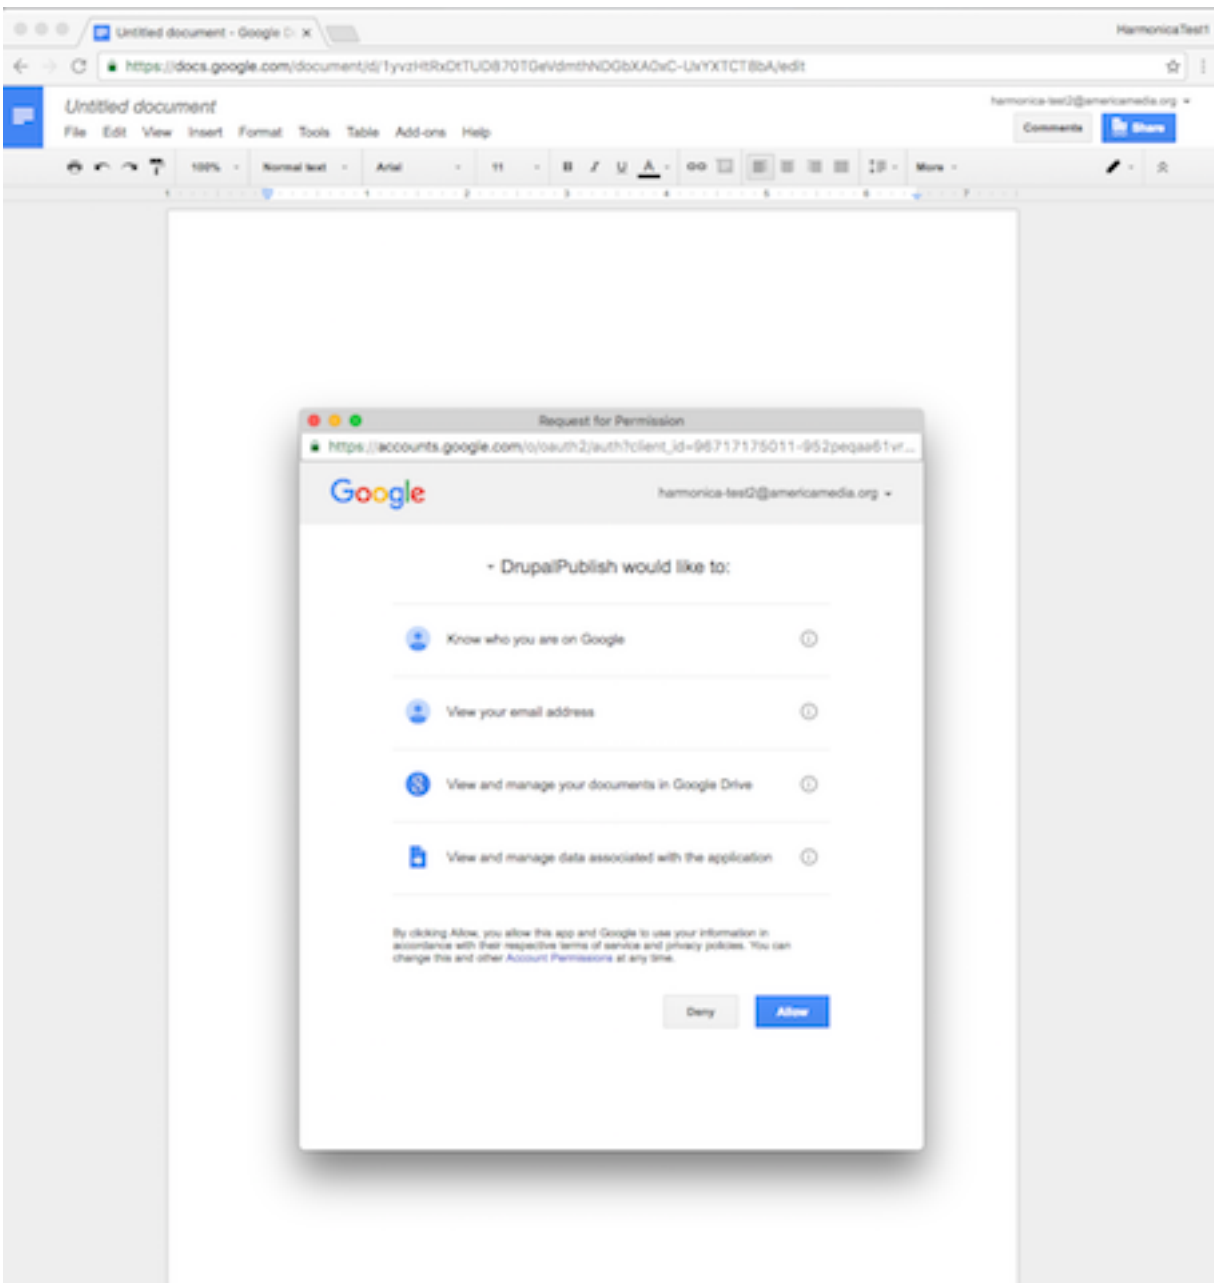

Figure 7: Permissions.

Check the version

Post-installation help text displays.

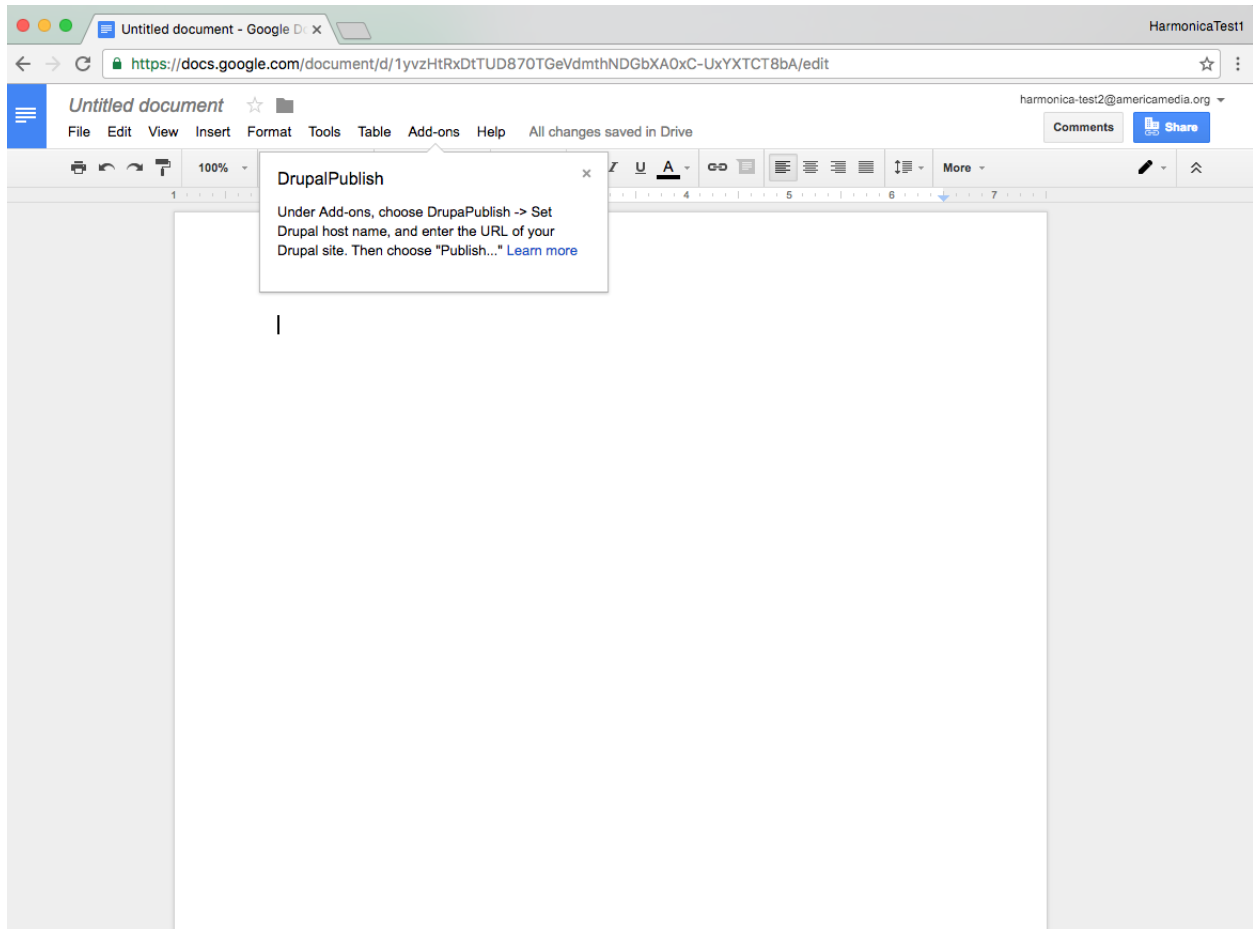

Figure 8: Help text.

Check installation

The Drupal Publish submenu is properly populated:

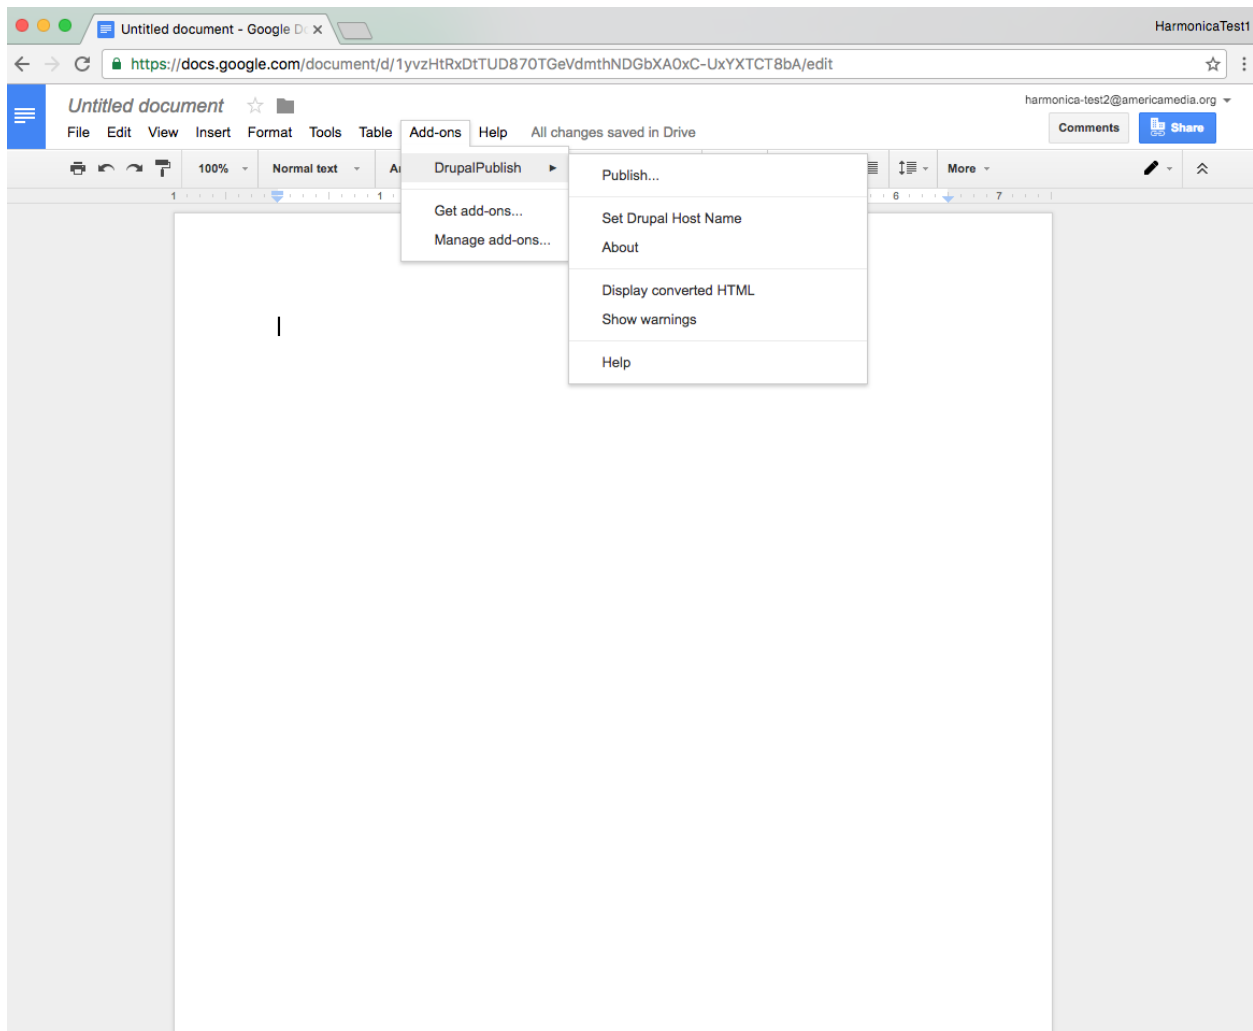

Figure 9: Drupal Publish menu.

Try publishing

Choose “Publish...” and the dialog appears, with Drupal host already set:

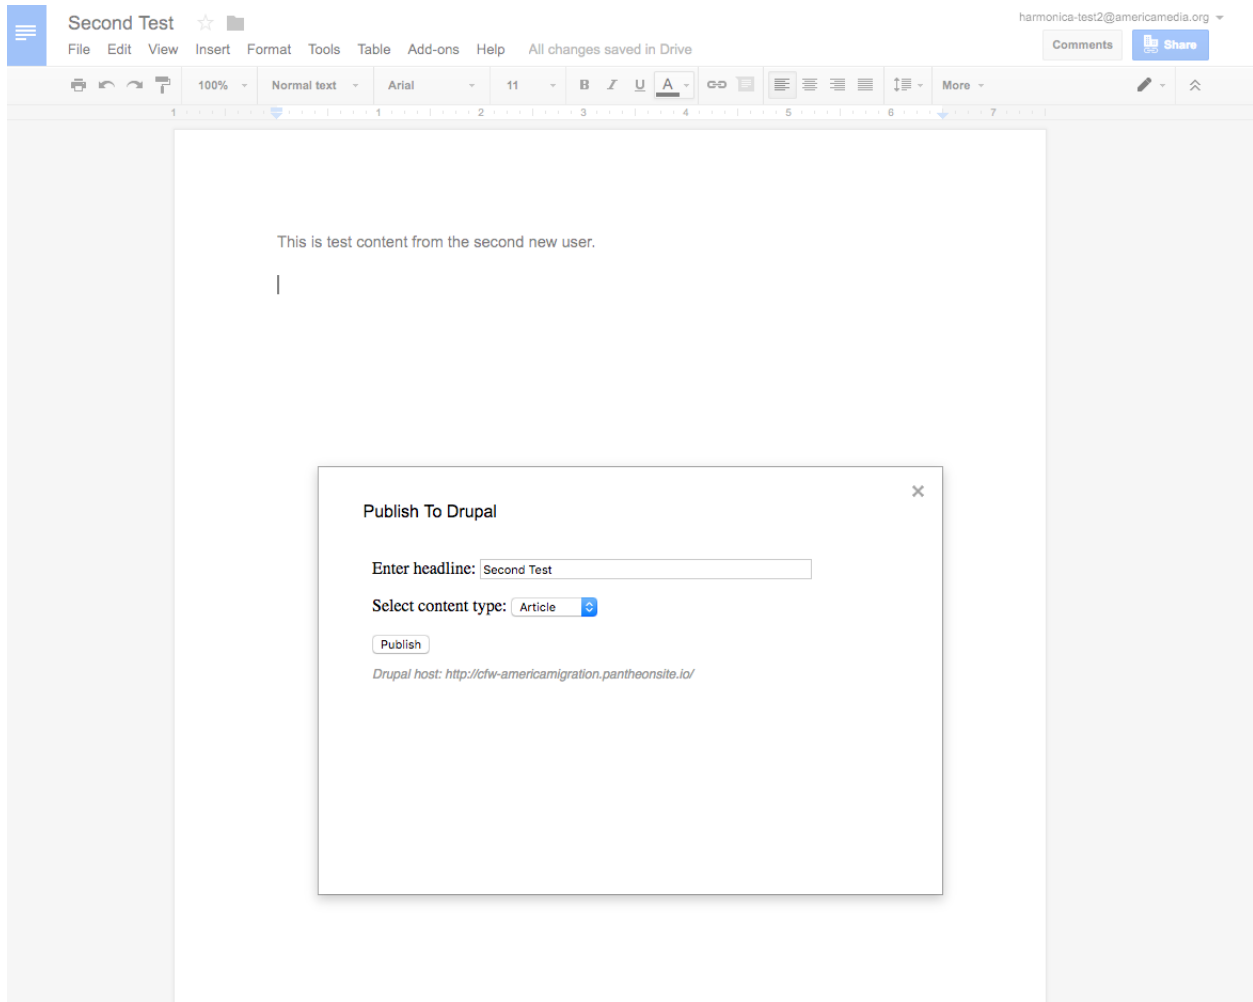

Figure 10: Publish dialog.
